Objective & Skills

I owned a sign shop in Carlsbad from May of 2015 to July 2022 after working at that location as an employee since 2004. After some post-pandemic struggles I decided to sell the business and seek out a new career path in web development. I am finishing a full stack bootcamp and I'm excited to jump into a new life adventure! I am very hard working, honest and loyal to my employers. I'm a fast learner and can take on new skills and procedures quickly and accurately. I feel that I'd be a great asset to any company and would love an opportunity to prove myself.
